Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

A clerical error was corrected in claim 16. Specifically, in claim 16, line 1, the word "A" was added as the first word of the claim.

Mr. Paul Angello verbally approved this change on December 08, 2003.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The Applicant filed an amendment received on September 23, 2003. In this amendment, Applicant amended the claims and introduced no new matter. Regarding independent claims 1 and 13, the arguments are persuasive. A review of prior art failed to disclose or make obvious a scanning magnetism detector probe comprising a material of single crystal having spin polarization in absence of optical excitation and electrical conductivity.

Claims 2-12 are allowed by virtue of their dependence upon claim 1 or claims that ultimately depend upon claim 1.

Claims 14-23 are allowed by virtue of their dependence upon claim 13 or claims that ultimately depend upon claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 4,985,627 to Gutierrez et al describes a spin-polarized scanning tunneling microscope with the probe made of a single crystal (iron). However, the reference is silent with respect to a probe comprising a material of single crystal having spin polarization in absence of optical excitation and electrical conductivity
